I have attached the draft response to a citizen requesting a Superfund Preliminary Assessment be completed at the Dewey Burdock abandoned mines. In the citizen's letter, it was requested that EPA suspend permitting of the proposed in-situ uranium mining. I have included in the response a paragraph on the UIC permits under review and that EPA will not suspend review of these permits. Could you review the portion of the response letter related to the UIC program. I have also attached the citizen's letter for your reference.

Could you complete your review today, since the due date on the control is early next week?
